

L1

floor lamp

rlon

L1 is about reduction to the essential.

A pure line, leaning modestly against the wall.

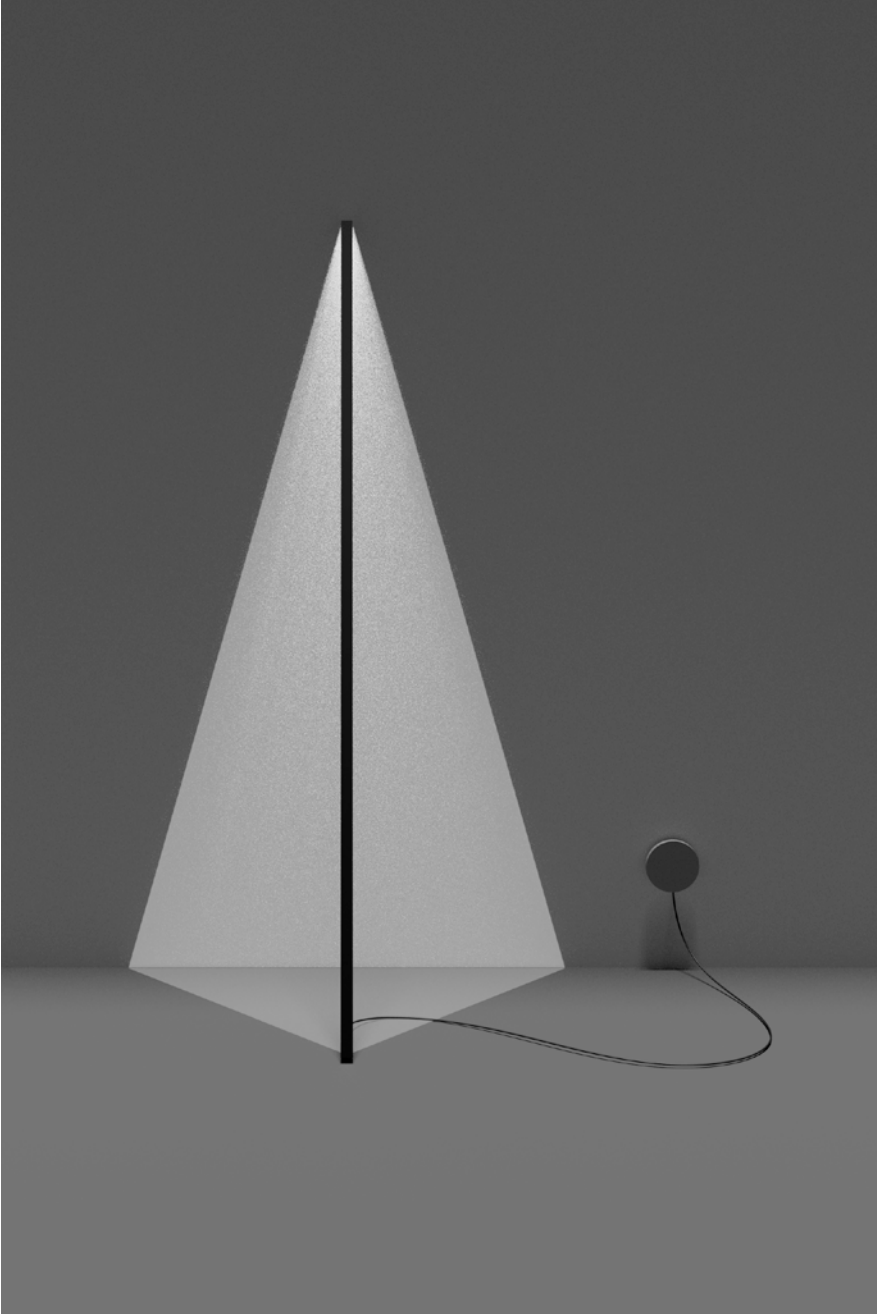

It can be touched anywhere.

A gentle click reveals its light.

Though the interface remains invisible.

L1 is a sculpture – from the outlet to the illuminant.

L1 is a sculpture – from the way you interact with it.

congratulations on your L1 floor lamp

This guide provides you with instructions on how to setup and maintain your lamp as well as safety notes and legal informations.

technical details

body

dimensions	1750 x 25 x 25 mm
------------	-------------------

power supply

wattage	7 w
---------	-----

voltage	220 v
---------	-------

cable length	3 m

25 mm == □

1750 mm

usage instructions

The following instructions apply both for the first setup of the lamp and a later maintenance.

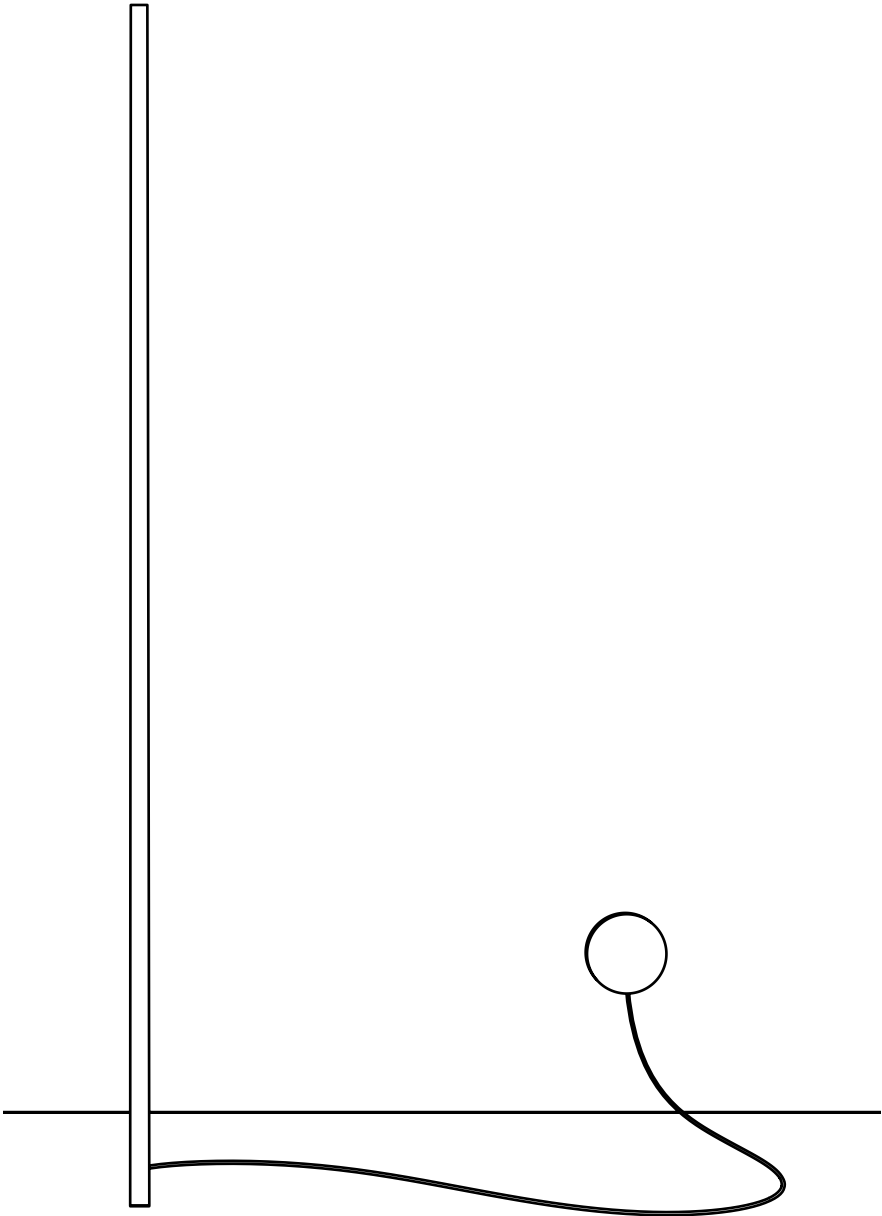

Caution: Before installing and whenever maintaining the lamp, ensure that the power line is disconnected!

Attention: The L1 lamp can only run with a grounded power outlet. Please make sure your power connection provides a grounding.

Please be careful when children are present. Bumping into the lamp may cause the lamp to fall and cause injury.

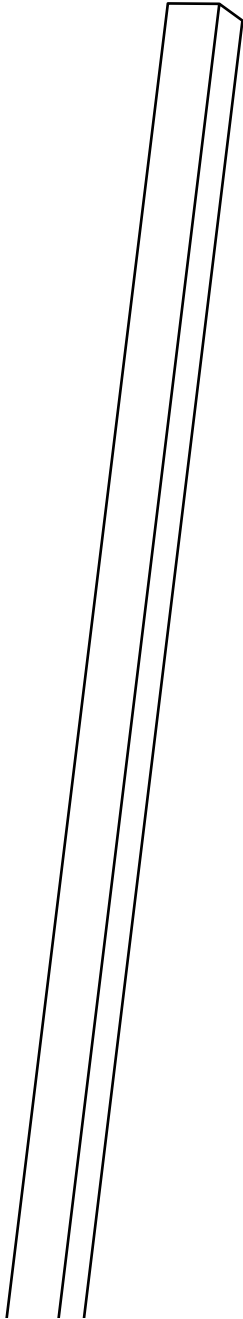

setup

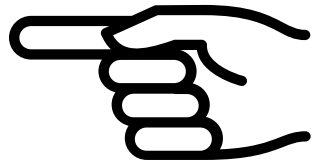

The touch sensor of the L1 lamp calibrates automatically whenever the device gets connected to the power line. To ensure the sensor works properly the lamp might not be touched while inserting the power plug and for 4 seconds after that.

sensor reset

In case the sensor function is impaired, please unplug the device and wait for 4 seconds before you plug it in again without touching the housing.

4 sec.

the sensor

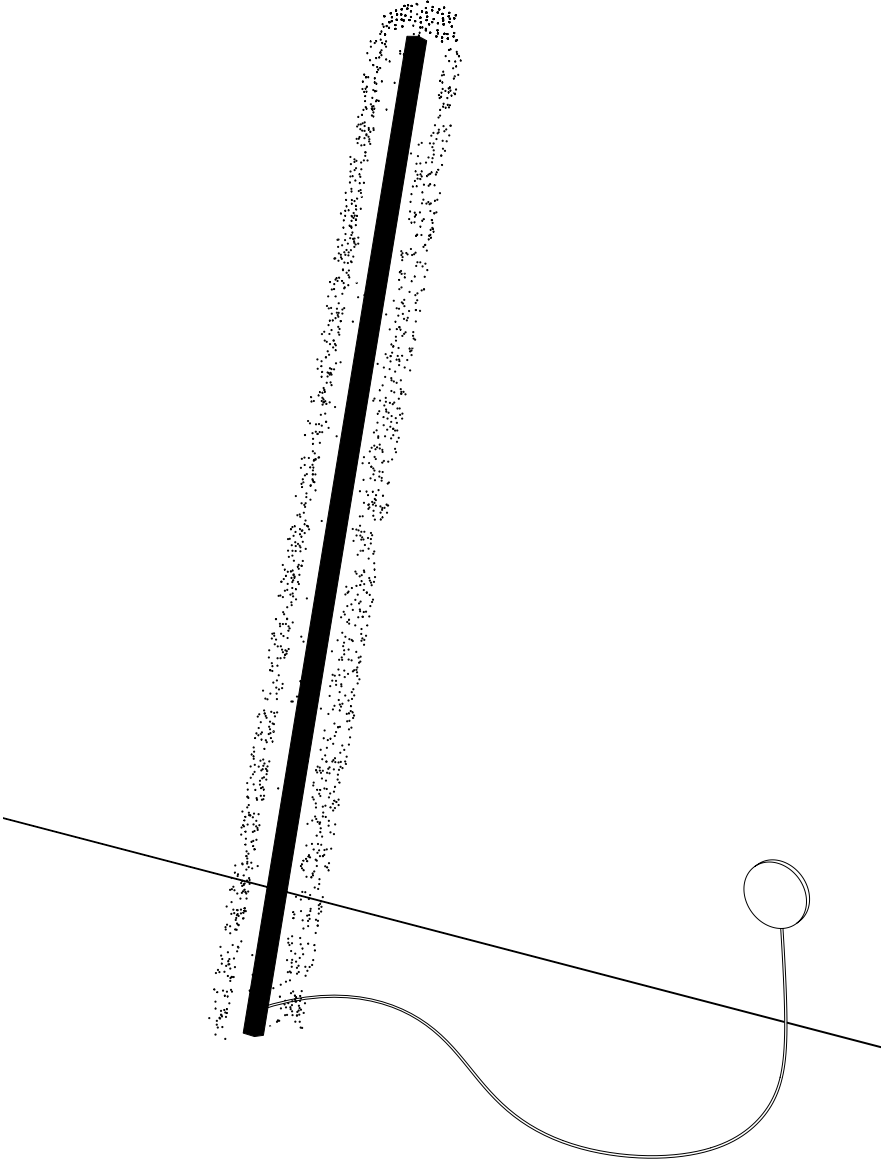

The technological key component of the L1 is a custom-built capacitive sensor that registers touches on the surface of the lamp – a functionality similar to the one of smartphone touch screens.

Connecting such a sensor to the long metal housing, makes the L1 switchable with a single touch.

However, this also means that the L1 is a highly sensitive object.

Even though we tweaked the sensor for this application, it can occur, that the L1 reacts differently when touched by persons with different skin conductance. In certain circumstances it can also occur that the L1 is impaired by other electromagnetic fields in its environment.

Shall such impairments occur, please try to reset the sensor as described on page 10. It can also help to change the position of the lamp or other electronic devices nearby.

SAFETY NOTES AND LEGAL INFORMATIONS

WARNING!

The safety of this lamp can only be guaranteed if these instructions are observed, during both installation and use. Please retain these safety instructions.

REMARKS

- ~ When installing and whenever maintaining the appliance, ensure that the power supply has been switched off.
- ~ The appliance may not be modified or tampered with in any way. Any modification may compromise safety causing the appliance to become dangerous. **r1on** declines all responsibility for products that are modified.
- ~ Should the external trailing cable get damaged, it must be replaced by **r1on** or by qualified personnel in order to avoid any danger.
- ~ Should the LED illuminant get damaged, it must be replaced by **r1on** in order to avoid any danger.
- ~ The product must be thrown out unlike urban trashes.

Attention

- ~ The touch sensor of the L1 lamp calibrates automatically whenever the device gets connected to the power line.
- ~ To ensure the sensor works properly the lamp might not be touched while inserting the power plug and for 4 seconds after that.
- ~ In case the sensor function is impaired, please unplug the device and wait for 4 seconds before you plug it in again without touching the housing.
- ~ Do not allow children near to the lamp. **r1on** declines all responsibility for injuries caused by children playing with the lamp or bumping into it.

Attention

The L1 lamp can only run with a grounded power outlet. Please make sure your power connection provides a grounding.

CLEANING INSTRUCTIONS

Use only a soft cloth to clean the appliance, dampened with water and soap. Before cleaning the appliance, ensure that the power supply has been switched off.

SICHERHEITSHINWEISE UND RECHTLICHE INFORMATIONEN

ACHTUNG!

Wir garantieren nur dann für die Sicherheit der Leuchte, wenn diese Anweisungen sowohl bei der Installation als auch beim Gebrauch genau beachtet werden. Bitte bewahren Sie diese Anweisungen auf.

BEMERKUNGEN

- ~ Bei der Installation und bei Eingriffen an der Leuchte ist sicherzustellen, daß die Anlage vom Netz abgeschaltet ist.
- ~ Der Apparat darf auf keinen Fall verändert oder unerlaubt geöffnet werden. Jede Veränderung desselben kann die Sicherheit in Frage stellen und somit gefährlich werden. **r|on** lehnt jede Verantwortung für unsachgemäß behandelte Produkte ab.
- ~ Falls das flexible äußere Kabel oder das LED Leuchtmittel beschädigt wird, muß es von **r|on** ersetzt werden, um Gefahren zu vermeiden.
- ~ Das Produkt muss getrennt vom Stadtmüll entsorgt werden.

ACHTUNG!

- ~ Der Touch-Sensor der Leuchte kalibriert sich automatisch nachdem die Leuchte ans Netz angeschlossen wird. Um die Funktion des Sensor zu gewähren, darf das Gehäuse der Leuchte beim Einstecken des Netzsteckers und in den ersten 4 Sekunden danach nicht berührt werden.
- ~ Sollte die Touch-Funktion beeinträchtigt sein, entfernen Sie bitte den Netzstecker, warten 4 Sekunden ab und schließen den Stecker wieder an ohne dabei das Gehäuse der Leuchte zu berühren.
- ~ Lassen Sie Kinder nicht in die Nähe der Leuchte. **r|on** lehnt jeder Verantwortung für Schäden ab, die dadurch entstanden sind, dass Kinder mit der Leuchte gespielt haben oder diese umgeworfen haben.

ACHTUNG!

Die Leuchte kann nur mit geerdetem Netzstecker betrieben werden. Bitte stellen Sie sicher, dass ihre Netzleitung über eine Erdung verfügt.

REINIGUNGSVORSCHRIFTEN

Bei der Reinigung der Leuchte bitte ausschließlich weiche Tücher verwenden und diese mit Wasser und Seife anfeuchten. Stellen Sie vor jeder Reinigung sicher, daß die Anlage vom Netz getrennt ist.
